

Key elements of Exempt Evaluation. [Click to View Details](#)

The questionnaire below will help determine if your research meets the exemption criteria or if Comprehensive Review is required. Guidance is available throughout the questionnaire and on the COUHES website, visit <http://couhes.mit.edu/>. Remember, you can always save your progress and return at any time. If you would like any clarifications or further assistance, you are encouraged to contact the COUHES office.

Exempt Id : **E- 1946**

* Title:

Inverse Pictionary Survey

* Principal Investigator:

Solar Lezama, Armando

* Department:

Electrical Engineering and Computer Scien

Faculty Sponsor:

Search: Faculty Sponsor Name

* Start Date:

2/17/2020

* End Date:

5/4/2020

* Summary:

We are collecting data on people's descriptions of animal images and their drawings of those descriptions. We want to measure the effectiveness of natural language as a means of embedding visual information. This experiment will be hosted as an anonymous online game. Participants will be asked to perform three tasks: (1) describe a randomly sampled animal image from our database in

(460 characters left)

Exempt Form

General

G1. Does your study meet the federal definition of research?

- ☒ Yes
- ☐ No

Research is defined as a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge.

G2. Does your research involve the use of human subjects from whom data is collected or was previously collected?

- ☒ Yes
- ☐ No

Human subjects is defined as a living individual about whom an investigator conducting research obtains data through

1) Intervention or interaction with the individual, or

2) Identifiable private information.

Interaction includes the use of existing data or data collected by or on behalf of the investigator, such as through surveys, use of existing data sets or existing biospecimens. Interaction also includes observation.

Prisoner Involvement in Research

P1. Does your research include prisoners as subjects?

- ☐ Yes
- ☒ No

Research in an Established Education Setting

E1. Is your study conducted in a traditional educational setting (classroom, seminar, lecture, afterschool program, etc.) that involves normal educational practices?

- ☐ Yes
- ☒ No

Benign Behavioral Intervention

☒ Yes
☐ No

Benign behavioral interventions are brief in duration, harmless, painless, not physically invasive, not likely to have a significant adverse and lasting impact on the subjects, and the investigator has no reason to believe the subject will find the interventions offensive or embarrassing.
See [NIH Clinical Trials](#) for more information.

B2. Does your subject population include only adults?

☒ Yes
☐ No

B3. Does your study involve deception?

☐ Yes
☒ No

Is the data identifiable?

☐ Yes
☒ No

The identity of the subject is or may readily be ascertained by the investigator or through associated research data.

Educational Testing, Surveys, Interviews or Observation

S1. Does your study involve the use of surveys, interviews, educational tests, or observation of public behavior?

☒ Yes
☐ No

S2. Does your study population include children?

☐ Yes
☒ No

S3. Is the data identifiable?

☐ Yes
☒ No

Secondary Use Research

D1. Does your study involve the use of biospecimen or private information?

☐ Yes
☒ No

Taste and Food Quality

F1. Is your study an evaluation of taste, food quality, or consumer acceptance?

☐ Yes
☒ No
